SUMMARY

Full-Stack MERN Developer skilled in building end-to-end web applications from dynamic frontends to robust backend systems. Proficient in MongoDB, Express.js, React, and Node.js, with expertise in RESTful API integration, authentication, and deployment on cloud platforms. Passionate about developing scalable, user-centric solutions that solve real-world problems efficiently.

EDUCATION

Bachelor of Technology in Computer Science

Shri Shankaracharya Technical Campus, Bhilai | 2022 - 2026 (Expected)

Currently in 7th Semester

Class XII

Shri Shankara Vidhyalaya | 81.7% | 2021 - 2022

Class X

Shri Shankara Vidhyalaya | 90.6% | 2019 - 2020

TECHNICAL SKILLS

- **Programming Languages:** C++, JavaScript
 - **Frontend:** HTML5, CSS3, React.js, Redux, Tailwind, GSAP, Framer Motion
 - **Backend & APIs:** Node.js, Express.js, REST
 - **Databases:** MongoDB, Firebase
 - **Version Control:** Git, GitHub
 - **Auth & Security:** JWT, bcrypt, Firebase Auth
 - **Cloud & Deployment:** Vercel, Netlify, Render
 - **Concepts:** Full-Stack Development, API Integration, Deployment, State Management, Responsive Design, SPA, SEO
-

PROJECTS / RELEVANT EXPERIENCE

AI-Powered E-Commerce Website → [Live Demo](#)

- Built a full-stack e-commerce website using the MERN stack with Firebase authentication, Razorpay integration and admin panel.
- Added Cloudinary for media management and an admin panel for seamless product CRUD operations.
- Integrated AI-powered voice navigation to enhance accessibility and user experience.
- Impact: Delivered a secure, scalable, and interactive shopping platform with improved user engagement.

Gitkeep Manager – VS Code Extension → [Live Demo](#)

- Developed a productivity-focused VS Code extension using JavaScript, Node.js, and the VS Code API to automate Git folder tracking.
- It automatically adds or removes .gitkeep files in empty directories, ensuring complete version control consistency.
- Features: Supports multi-level nested directories, configurable ignored folders, and tested on large MERN projects.
- Impact: Simplified Git repository management and improved developer workflow; published on the Visual Studio Marketplace for public use.

ReactAI – AI Image Enhancer → [Live Demo](#)

- Built a MERN-based web app using Generative AI APIs to enhance and upscale images automatically.
 - Added features for noise reduction, super-resolution, and side-by-side before & after preview.
 - Developed a responsive frontend with React, Tailwind CSS, and Vite, and backend APIs with Node.js & Express.js.
 - Impact: Empowered designers and creators to instantly generate high-quality, AI-enhanced visuals without manual editing.
